A NEW CHEVROLET SIX

*MADE TO ORDER
FOR CANADIANS

with Fisher NO-DRAFT
Ventilation System

For months, Chevrolet and General Motors asked automobile owners—"What do you want in your next car?" For months, our engineers planned, improved and tested—with the results of this Canada-wide survey to guide them. Today, we invite you to get full details of the new 1933 Chevrolet Six—Made to Order for Canadians—styled, powered and priced to be first choice among low-priced cars!

It's the most exciting Six in Chevrolet history—with the most revolutionary development since the closed body—Fisher NO-DRAFT Ventilation, individually controlled.

What Other NEW FEATURES?

New "Air-Stream" Styling . . . Anti-Splash Fenders
... Larger, Lower Fisher Bodies . . . More Horsepower
... Cushion-Balanced 6-cylinder Engine . . . Shatter-proof Windshield . . . Silent Second Synchro-Mesh
... "Starters" Simplified Starting . . . New Octane Selector . . . Even Greater Economy.

Stony Plain and District

Mr and Mrs Frack Lutes, who had been visiting here with Mr and Mrs Michael, left this week for their home at Halkirk.

Mr Morrison, the popular night station agent, has returned to Edson.

Mr and Mrs Brown have moved down from Peers, and are now occupying the Armstrong house on First ave. Mr Brown is the new night station agent.

Mr Smith and boys have moved to the house on Third ave. on the Harmell farm.

Mr and Mrs Sybble and family, who had been living on the Val Mohr farm, west of town, have moved to Stony and are now located on 3rd av. west.

Mr Chas Mills, who had been in an Edmonton hospital, recovering from an accident, has recovered sufficiently to be removed to his home at Inga.

Messrs Christie and Nichol returned on Saturday from a three-day motor trip to the Ronzer Ranch, at Moon Lake

The Prize Givers.

The first of the series of whist drives by the town band took place this week. A fine line of prizes are being awarded, which have been donated by the business people of Stony Plain—

Senior Hockey News.

Friday 13th—Seniors were engaged to play at Fort Sask'n, but the trip was not made owing to the indisposition of the publicity agent.

Sat. 14th—Edmonton Journal's team played Seniors on local ice. Score, 6 all. Scorers for Stony—O Miller 1, G Miller 2, H Trapp 3. At the close of the game the visitors were served a chicken dinner in the banquet hall at the Royal Cafe.

Jan 15th—Seniors motored to Beverley, and beat the Miners 1-0. Henry Trapp making the only goal in the game.

The Seniors played at the Fort on the 18th, and are expecting a return game here with them on the 22d.

A team from Recreation Hall, Edmonton, is billed for a game here Jan. 29.

The Senior Manager has been offered games by the St. Albert, Morinville and several other teams and these will all be accommodated in turn.

GOOD NEWS "without money and without price"

"THE KINGDOM OF HEAVEN AT HAND"

"Thousands of Churches are without ministers not withholding the great need of preaching the Gospel"

"There is a Kingdom at hand—be hearing the Word of God—Hear it!"
The people need the truth as never before. Will you do your part? The International Bible Students Association will supply ministers of the Gospel free of charge on application. Conditions: Open the church buildings; admit all free; take no collection.

ORANGE PEKOE BLEND

"MILBURN'S" TEA

"Fresh from the Gardens"

Less Criticism; More Co-Operation

Within a few days Parliament will re-assemble at Ottawa after a long Christmas and New Year adjournment, and almost simultaneously the Legislatures of all the Western Provinces will meet in annual session. In view of conditions at present prevailing, people will manifest a deeper interest in the proceedings of their elected representatives than is usually the case. When times are prosperous and everybody busy, people are inclined to take their Parliament and Legislatures very much for granted, but, with the times temporarily out of joint, people not only take a greater interest in public affairs, but adopt a much more critical attitude.

At the very time this more critical attitude develops, and when many people are inclined to demand and expect the responsible of their public men, the very conditions which develop this attitude of mind also create problems extremely difficult of solution, notwithstanding the best intentions and keenest desire on the part of members of Parliament and Legislatures to sincerely grapple with and solve them. In their impatience for definite and immediate results, many people adopt a most unfair attitude towards those in whom the nation has reposed its confidence and who, like the masses of the people, are anxious to do the best they can to overcome existing difficulties and rid existing wrongs.

True, public men differ in their views as to what should be done, but in this they merely reflect the general public, and in these times it is almost impossible to find any two neighbors actually agreeing upon policies and methods that should be adopted. True, too, public men in their endeavors to find solutions make mistakes, but in this they are not one whit different from the average man who today may be vigorously criticizing and condemning legislators for their mistakes. Because of the very magnitude and complexity of the problems now confronting the country, and many of which cannot be solved by any one Province or nation, but only through united action by all nations, men occupying representative and responsible positions are deserving of sympathy, consideration, and support.

When Parliament meets it will have the Duff Commission report on the railway problem to deal with. In striving to reach a solution of this large and intricate problem, some things will, no doubt, have to be done which will not be pleasing to this interest, or class, or community. Any solution will involve inconveniences and sacrifices, and if each such interest, class or community adopts a purely selfish attitude and emphasizes its own particular rights and privileges to the extent of ignoring the benefits to be conferred upon the whole country, then there can be little hope of any solution being reached.

At this time, as was the case during the war, individuals and committees must take the broader viewpoint of the welfare of the whole country. Our Parliamentary representatives must approach the problem from that standpoint, rather than from the standpoint of their individual constituency. And this general statement of policy is likewise applicable to other large issues which now face Parliament. None of them can be decided upon local or provincial viewpoints; they must be dealt with as national problems. If people generally will keep this idea firmly fixed in their minds there will be less tendency to indulge in criticism, and the finding of solutions made much easier.

In our Western Legislatures major questions that will call for consideration and action include the drafting and passage of wise and effective legislation dealing with such matters as adjustment of debts, arrears of taxes, balancing budgets, measures to alleviate unemployment, and to provide adequate relief where needed, while at the same time not further increase the burden of taxation already almost beyond the ability of the people to carry. To these matters our legislators, irrespective of party affiliations, may, we believe, be trusted to bring their best judgment in really sincere efforts to find the very best policies and put them into effect.

Irrespective of what is done, there will, of course, be some dissatisfied people. Possibly, everybody will be more or less dissatisfied. Where one approves of what is done, others will disapprove, while in regard to something else those who first approved will disapprove, and those who disapproved will approve. It is ever so in a democracy, but it is out of this conflict of views and opinions that compromises emerge, and it is only through compromise that democratic representative government can be carried on. It is always the average view that must prevail for the average good, not the extremist views either of the right or the left.

The thought we wish to emphasize and leave with our readers is, that the responsibility for successfully "carrying on" and "carrying through" these troublesome times does not rest solely upon members of Parliament and Legislatures. It rests equally upon the individual citizen. Instead of adopting a whole critical attitude, a fault-finding attitude, the individual citizen should extend friendly advice and assistance to his elected representative, and should co-operate with him in the common endeavor to work out what is practical and best for all, whether it is everything such citizen favors and desires or not. Only so can the best results be achieved in times of stress and difficulty like the present; only so, in fact, can a maximum of wise policies and good government be attained. It is not good citizenship, but the reverse of it, to make demand for impractical, impossible policies, and then to criticize and oppose what actually is done.

This is a time for all to work together, whether in government or opposition. They need not necessarily merge into one; in fact such a merging might be a mistake because constructive criticism in times like these is more important than in more normal times, but all criticism should be constructive, and co-operation should be the order of the day. And it should be exercised fully and completely by the individual citizen who is expressing such action by his elected representatives in Parliament and Legislature and municipal council.

Was So Short of Breath Could Not Lie Down to Sleep

Mrs. P. J. Chernoff, Shorocres, B.C., writes—
"I had been so troubled with shortness of breath I could not lie down to sleep."

"I couldn't do any hard work, or climb the stairs, and had nervous and smothering feelings, and became very weak."

"I tried all kinds of medicine, but could get no relief until after I had taken three boxes of Milburn's Heart and Nerve Pills, and since then I have felt better in every way."

For sale at all drug and general stores; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Looking Into the Future

Dean Inge Draws Another Gloomy Picture

Dean Inge drew a picture of England 1,000 years hence when speaking in London recently. He considered that by that time England would have a population of only 20,000,000—about half the present population—and that they would live mainly in villages.

"Physicists and astronomers tell us there is no reason why this planet should not be habitable by human beings a million years hence, but whether the human beings will be as all like us and recognizable as men is very difficult to say," he said.

"London may be a hundred feet under water 30,000 years hence, and another ice-age is due at some period which may make these islands uninhabitable."

"I do not think it is at all possible that we shall ever colonize Mars and Venus or that we shall ever be as hot as the sun. I do not think many people believe in the canals which an ingenious American saw there."

"As for Venus, there is some reason to think the whole planet is under water. We might have one nice hot bath there before being devoured by a dinosaur. Besides, there is the impossibility of ever getting there."

The Dean said that our race had not intrinsically made any progress since the discovery of tools. Sixths of 40,000 years ago which has been found seemed to have brains as good as our own.

The changes going on were for the most part degenerative: Our jaws were getting narrower. We were becoming baldier.

Possibly our sight and hearing were not so good as those of the savages. Our sense of smell was less keen, and we were losing our claws and fur.

Return To Barter

Balkans Are Considering Swine As Medium For Exchange

Cash money has become so scarce in Central European countries that a return to barter, with swine the medium of exchange, has been inaugurated and may be extended in parts of the Balkans.

At Kragujevac, in Jugoslavia, the authorities have contracted with an Austrian firm for 100 carloads of brass parts needed in the arsenal there. These will be paid by delivery in Austria of 100 Jugoslavian hogs. Meantime negotiations are underway between the National Railways of Czechoslovakia and Hungary. Under the present arrangement each receives payment for mileage on its tracks sold by the other line. The monthly balance due Czechoslovakia from Hungary is running about 1,000,000 Czech crowns a month. Hungary cannot conveniently cover the amount in cash and has offered to settle monthly with Hungarian pigs.

Landing Field Of Cruiser Equipment

Swedish Ship Under Construction Will Be Up-To-Date

Equipped with its own landing field the Swedish cruiser, "Gotland," now under construction, will be an interesting experiment in sea warfare. The landing field astern will be a wide, heavy strip of canvas, which will pick up seaplanes travelling at full speed. The planes will run up on the outer end of the strip which will rest on crosswise pontoons. Then the "planes," with folded wings, will be hauled up the canvas incline to the deck by a hoisting crane. To launch the planes a rotating catapult will be employed which can shoot the planes into the air even against a contrary wind.

"I'm afraid the car does not suit us," wrote the new motorist. "My fiancée cannot reach the brakes and the steering wheel at the same time."

"The car is perfect," wrote back the agent. "I suggest a new girl."

During the year ending December 31, 1931, Saskatchewan shipped 267,869 tons of lignite coal from local mines to supply fuel needs in the province of Manitoba.

W. N. U. 1937

Armament Expenditures

United States Appears To Be the Most Culpable in This Respect

The insistence by spokesmen of the United States, official and unofficial—President Hoover, Mr. Stimson, Senator Borah and apparently three out of four newspapers in the country—that the debtor nations must reduce their outlays on armaments before they can talk revision of debts with the United States, has drawn the retort from the Paris press that the greatest sinner in the way of outlays on armaments is the United States itself. "Le Temps" gives these comparative figures:

The President of the United States insists that what he believes is a formidable increase in military expenditure constitutes one of the most important factors in the world-wide disequilibrium of national budgets with an unfavorable effect on credit and on monetary systems. But no country in the world has increased its military expenditure to the same proportion as the United States have increased theirs, even though their country is not exposed to any danger and its only pre-occupation has been to obtain naval parity with Great Britain.

"In 1916 the whole military and naval expenditure of the United States was \$267,000,000. In 1930, according to figures communicated by Washington to Geneva, the total figure had reached \$700,000,000."

Find Fossil Bed In West

Evidence Of Prehistoric Age Discovered Near Swift Current

Discovery of a new locality for fossil mammals in Canada is announced by Dr. L. S. Russell and Dr. R. T. D. Wickenenden of the geological survey, Department of Mines, Ottawa.

Working in the vicinity of Swift Current, Sask., these two government paleontologists obtained a small collection of fossil teeth, which proved to represent animals of late eocene times, not previously found in Canada. Such fossils have been found in Utah and have been more recently discovered in southern California.

The Saskatchewan collection includes teeth of a rhinoceros, of titanotheres (large, horn-bearing beasts), of a three-toed horse, primitive ante-lope-like creatures, and a forerunner of the squirrel. Most interesting is a single rabbit tooth, one of the oldest known records of such animals.

The fossil-bearing beds are part of a great sheet of coarse-grained rocks extending over the Cypress Hills and eastward to Swift Current, and resting on the irregular surface of the older formations. There are indications here that southern Saskatchewan during the early part of the age of mammals had valleys and uplands differing in elevation by as much as 1,400 feet.

Landlord Accepts Vegetables

Fruit Also Helps Pay Rent In New South Wales

If people in New South Wales cannot pay their rent in cash landlords are accepting barter rather than turn them out. Potatoes, turnips, melons and pumpkins are being paid for a hut and five acres of land. One tenant gave his landlord more than 100 cases of fruit, and still is settling each week in fruit. A man in Paramatta pays in poultry and eggs, and his landlord sells them in his produce shop. An Australian mechanic supplies the owner of his house with milk and eggs, and has offered to keep his car in condition. Another tenant delivers loads of wood. A dairyman, suffering from a milk war, pays in calves and heifers. But the War Service House Commission balked when a tenant started to deliver several hundred pounds of pumpkins.

A Floating City

Among the "comforts" provided for passengers on the new French liner "Normandie" are a theatre, a church, a "street" of shops, cafe, dance salon, winter garden, and a garage. The ship also has six separate wireless installations on board.

Australia is sometimes called the "shadeless land." The leaves of some of the trees there are so arranged as always to present their edges to the sky.

chest COLDS

Beautiful Cape Town

South African City Has a Noble Setting and Wonderful Climate

It may be truthfully be said that few places in the world compare with the Cape Peninsula, South Africa, either in scenery, climate, verdure, woods, water, salubrity, or association.

Table Mountain, upon which Cape Town sits, is a noble sight. Its feet dangle in Table Bay, throws its ever-changing shadows upon a land of trees, flowers, odoriferous plants, oak groves, pine woods, healthful hills and arum-lilled valleys.

In all the world there is, perhaps, no city so absolutely beautiful as Cape Town. A nobler site for a city could hardly be imagined. It rivals Gibraltar and Constantinople, Bombay and San Francisco. Immediately behind the town, which lies along the sea, the majestic mass of Table Mountain rises to a height of 3,500 feet, a steep slope capped by a long line of sheer precipices more than 1,000 feet high, and to the right and left by bold, isolated peaks. The beautiful sweep of the bay in front, the towering crags behind, and the romantic pinnacles which rise on either side make a landscape of unusual grandeur.

Cape Town enjoys a most equable climate. There is a wealth of sunshine at all seasons of the year. The breeze blowing fresh from the sea tempers the rays of the African sun. Passengers on the "Cape Mail" cruise around the world via the Southern Hemisphere will reach Cape Town on the 18th of next April. Visitors will be amazed at the vast variety of orchids that grow wild all the way from the outskirts of Cape Town to the tops of Table Mountain.

Some people may be content with viewing and admiring the gorgeous display of flowers offered for sale in the attractive booths on Adderley Street, but to properly appreciate the exquisite beauty of the Peninsula flowers they should be seen growing in their natural habitat.

One of the strange flowers found is the parasitic "Harveya," whose delicate blooms turn black if handled. Another is the "sunder" whose leaves are covered with sticky glandular hairs for catching insects, on which it seems to feed. Cape Town is in the same latitude as Montevideo, Uruguay, and Sydney, Australia.

Imperial Airways Record

Imperial Airways have since their inception, flown just on 10,000,000 miles and have carried over 200,000 passengers and more than 6,000 tons of mail, parcels, and urgent freight. From the all-important aspect of reliability, the figure for flights completed to schedule has risen from 75.3 per cent in 1924 to 96.16 per cent in 1932.

"Do you have much variety at your boarding house?"

"Well, we have three different names for the meals."

World Has Still Much To Learn About The Production And Distribution Of Our Food Supply

Some day when dreams of internationalism come true and the world is just one big neighborhood, folks will marvel at the confusion reigning today over the production and distribution of foodstuffs. It is probable if political interference were abolished and adequate international currency facilities were invented, that production of necessities by cultivation of the soil would settle to a beneficent normal pretty shortly. Every last human being would have enough and to spare and starvation and disease from malnutrition speedily would become unknown.

But in the crazy system now prevailing in the world, we have all sorts of policies in force either to spur on reluctant production or to curb production where the bounties of earth are easily and naturally obtained. The American Congress will spend a great part of its session in trying to secure adequate rewards for American farmers if they will not produce too much. Over the greater part of Europe, governments are using the people's money to stimulate farm production so that they need not buy from nationals other than their own.

Great Britain, through a complicated tax system, virtually is paying a bounty for the growing of wheat in the British Isles. Germany and Italy and France are providing, at public expense, rewards for increased production of farm products. The Netherlands government is experimenting with price fixing to encourage wheat growing. On the other hand, Netherlands regulations would check the raising of too many hogs by furnishing a limited number of tags to hog raisers and requiring every such animal going to market to be tagged, as is the practice in this country with reference to the shipment of deer. Brazil, to maintain the price of coffee, resorts to the ridiculous system of pegging the price by the government buying and then destroying all surpluses.

The human race can hardly boast of its wisdom while it resorts to such uneconomic practices in managing its food supply while millions of its members are not well fed.—Detroit News.

Legends Are Mere Myths

Trees Credited With Unnatural Powers Are Quite Harmless

The man-eating tree of Madagascar which an explorer has announced he is going to find, is one of the world's hardest myths. Quite obviously a tremendous exaggeration of such familiar insect-eating plants as the sundew and the Venus fly-trap, it has been used for generations by Madagascans to fool credulous people.

The legend of the deadly upas tree of Java is another similar yarn. The guileless-looking Malay tells the visitor of a tree so poisonous that its very "breath" kills all plants and animals for miles around. Actually the upas tree ("upas" is Javanese for "poison") exists, but it is easy to approach, and its poison has to be jabbed into you on an arrow point to do you any harm.

Wheat Shortage In Roumania

School children, theological students, police and soldiers in Roumania will have no white bread until next harvest. It has been discovered that the wheat crop is shorter than expected. The minister of public instruction has advised boarding schools to serve rye bread and "manna," a stiff porridge.

"Henry," said his nagging wife as she prepared to retire. "Is everything shut up for the night?" "That depends on you," muttered Henry. "Everything else is."

Sultor.—"Er—I er—am seeking your daughter's hand—er—have you any objection, sir?" Father.—"None at all. Take the one that's always in my pocket."

W. N. U. 1977

Market For Alfalfa Hay

English Dairymen May Import It As Feed For Calves

Sale of alfalfa meal and alfalfa hay have never been extensive in the West of England, but increasing interest is being shown in both these products recently. In view of the fact that in the West of England and South Wales clover mixture is solely in demand as a feeding stuff, alfalfa hay not being favored, it is interesting to learn that the Gloucestershire Milk Recording Society have been conducting experiments with alfalfa hay as a feed for calves, and they are of the opinion that it may increase the butter fat content and improve the color of the milk. There is a possibility that if this becomes popular they may import alfalfa hay. California alfalfa meal is quite out of the market owing to the adverse exchange situation. South African meal, however, is not affected and it is said to be of a deeper green color than that from Canada and is, therefore, well liked. Last year there were certain imports from Canada which have been apparently quite satisfactory.

Present prices which are being offered for the South African meal with a fibre content of 27 per cent range from \$26.12 to \$26.60, figuring exchange at \$3.80 to the pound sterling per ton of 2,240 pounds, c.i.f., London or Liverpool. Supplies from Canada have an advantage in this market over those from South Africa, as very few South African vessels call at Avonmouth, whereas a continuous service is provided between this port and Canadian ports. Recently offers of Canadian alfalfa meal have been made at \$25.17 by consumers, which would mean about \$24.70, c.i.f., Avonmouth, to the shipper. In addition to its being a deep green color, importers insist that the meal be finely ground, but not dust, and that leaf and not stalk be used for grinding purposes.

Oil Penetrates Metal

Astonishing Discovery Was Recently Made By Two Experts

Discovery that oil penetrates metal instead of merely forming a clinging film on its surface, as formerly supposed, may improve lubrication methods. According to two experts, who recently reported this surprising fact, oil may be wiped from the surface of a bearing, and a new film will soon appear.

"Not a bad novel, but I only publish works of men with well-known names."

"That is all right—my name is Smith."

Gregory I., a follower of Benedict, made Pope in 590, was the first monk to take the papal office.

New Photographic Telescope In California Will Bring Planets Into Close Range Of Vision

Strange Strain Of Cattle

Native To Philippines Cannot Live Without Salt Water

From the Philippines, United States Protectorate in the Pacific Ocean comes word of a strange strain of cattle which cannot live without salt water.

Dr. Emilio Sanson, supervising veterinarian of the Philippine Bureau of Animal Husbandry for the district of Zamboanga, has submitted the first formal report on the extraordinary salt-water cattle of the Sulu Islands.

The animals require brackish or even sea water to survive and have long been a puzzle to scientists. A series of experiments was conducted in which it was established that these cattle, if removed from the salty marshes of Sibutu, near Jolo, and put upon fresh water and normal pasturage, die within a short space of time.

Fresh water is not obtainable on the small islands to which they are indigenous, and it is the belief of Dr. Sanson that they offer an interesting study in natural accommodation to prevailing conditions. Converse experiments were conducted and cattle, carabao, horses and goats taken to these islands. They are reported to have accommodated themselves quickly to salt water and the prevailing pasturage and eventually to have thrived. So far, however, all attempts to transplant the truly native stock to other and presumably more favorable conditions have resulted in failure.

The meat of the salt-water cattle is darker in color than that of fresh-water varieties and is not easily susceptible to refrigeration. The commercial market is restricted to the Sulu group, but the Bureau of Animal Husbandry hopes eventually to establish some type of refrigerating station near the islands so that it can be put on the Manila market.

C.N.R. Rails For Japan

More than 100 miles of second hand rails were shipped to Japan from Saint John, N.B., in the steamer "Ferdale." The rails, weighing 4,750 gross tons, are under standard gauge and represent replacements on the Canadian National lines in New Brunswick, Nova Scotia and Prince Edward Island during a period of over three years.

The Central Railway of Peru was constructed between 1871 and 1891, and has 132 tunnels and bridges along its course.

The moon and some of the planets will be brought theoretically to within 25 miles of the earth by the new 200-inch photographic telescope at the California Institute of Technology at Pasadena, California, according to Dr. Frederick C. Leonard, head of the department of astronomy.

It may be possible to distinguish objects 30 feet apart on the moon's surface by employing a magnification of 10,000 diameters in the giant telescope. Ordinarily much smaller magnification is used because of atmospheric conditions. However, with proper atmospheric surroundings the greater reflection range would enable astronomers to view the moon and other heavenly bodies at extremely close range.

This telescope is designed to collect and photograph in a unique manner a vast field of heavenly bodies. However, the machine can be adapted for direct observation.

Mount Wilson Observatory, where the 100-inch telescope is located, now the world's largest, is just a few miles from the California Institute of Technology. The institute and the observatory collaborate on astronomy research and findings.

Dr. Leonard points out that estimates have revealed that there are in the neighborhood of 560,000,000 stars brighter than the nineteenth magnitude, which is the visual field limit of the 100-inch telescope. Although no estimate has been attempted as to the number of stars of the 200-inch instrument, Dr. Leonard declared that probably a billion and a half stars would come within its range. Hence the giant telescope will reveal about as many stars as there are people on the earth. The photographic lens makes possible the recording of a far greater number of the heavenly bodies than can be detected with the naked eye, to which only about 6,000 stars are visible, Dr. Leonard said.

A telescope is designed to collect light and not to magnify, as is commonly supposed by the layman, the scientist explained. It can be compared to a funnel, collecting light and concentrating the rays in a small beam to be in turn directed to the eye of the observer or to the photographic plate. In fact, making stars appear nearer is just one of the purposes, Dr. Leonard explained. Should a star suddenly be destroyed and cease to give off light rays it would be millions of years before the planet would be invisible to people on earth. This is due to the fact that light rays now leaving the stars will not reach the earth for ages to come.

In describing telescopes, Dr. Leonard explained that there are just two principal types—refracting and reflecting. The refracting telescope is similar to opera glasses, and is composed of a large double convex lens, or object glass. This glass, located at the upper end of the instrument tube, gathers light from the stars, concentrating the rays to the eye of the observer.

The reflecting telescope is composed chiefly of a large concave mirror, silvered on the front surface rather than the back, as with ordinary mirrors. This mirror is mounted at the lower end of the tube in the refracting telescope.

Seven Is Lucky Number

Replaces Thirteen With Gamblers At Casino Along Riviera

There is a craze for the number seven among gamblers at the casinos along the Riviera. They maintain that seven has replaced thirteen as a significant number, pointing out that last France's great tragedies last year occurred on the seventh of the month. Thus:

On January 7, M. Maginot, Minister of War, died.

On March 7, M. Briand died.

On May 7, President Doumer was assassinated.

On July 7, the submarine "Printheuse" was lost.

The tragedies happened in each alternate month.

JAPANESE CONSOLIDATE MILITARY POSITIONS—CHINESE RETURN FIRE

Here is a section of the Great Wall of China at its strongest point outside the city of Shanhaikwan. It is here that Japanese tanks and artillery made a breach and stormed the city, inflicting severe casualties on the Chinese defenders. The map shows the general location of the latest "war area." Shanhaikwan, as can be seen, is the gateway to Jehol Province. Last, lower left, is General Yoshimichi Sasaki, who commands the Jap forces at Shanhaikwan, and at the right is Marshal Chang Hsiao Liang, Chinese commander, whom the Japanese blame for the overt act that started hostilities.

WORLD HAPPENINGS BRIEFLY TOLD

Following a three months' adjournment the joint committee which is investigating the administration of the Pension Act reassembled in Ottawa.

W. Martin Griffin, K.C., Vancouver, has been retained by the Dominion government to revise the Canada Shipping Act. He has gone to Ottawa to undertake the work.

Sir Hubert Wilkins, noted British explorer, said he planned to leave the United States in April for Norway to join the Ellsworth-Balchen expedition to the Antarctic.

Amendments to the Canada shipping Act are being drafted. The legislation will be brought down this session. The measure was let stand over from the previous session.

Charles Wong, first Chinese to receive a private aeroplane pilot's license, is leaving Winnipeg for China where he will join the Chinese government air force.

Sailing alone in an 18-foot skiff, Fred Rebell, Australia's "height of folly" navigator, put in at San Pedro, California, January 9, after a year-long, 8,000-mile voyage from Sydney.

Canadian winter colors will be exhibited in at least 12 of the largest cities in Great Britain in the next year and a half, officials of the National Gallery stated at Ottawa.

Julius Montagu Williams, scientist, lecturer, picturesque missionary of another day among the Indians of Northern Ontario, Alberta and Saskatchewan, died suddenly in Toronto in his 70th year.

International debts may be used by the United States to reduce trade barriers against the products of that country, according to the opinion expressed by Premier Bracken during an interview at Winnipeg.

Prof. John H. Williams, one of the American delegates to the preparatory committee for the world monetary and economic conference, told the committee that he believed high protective tariff sentiment in the United States is abating.

Flight Scheme Dropped

Professor Piccard Will Not Ascend From Hudson Bay District

Canada's Hudson Bay district will not see a flight to the stratosphere by Professor Auguste Piccard after all. The famous explorer of the upper regions is in New York where he starts a series of lectures.

The reason he will not make the Hudson Bay attempt himself, he explained, is because, "The men who make the flight must be scientists familiar with the northern regions."

"The greatest difficulties of that attempt would be landing in that remote region and transporting the materials and equipment," he said. "A system of signals for guiding the pilot from the ground by wireless must be used."

First of all, Professor Piccard said, it would be necessary to find a man, "with a big pocketbook," who also had a genuine, intelligent interest in scientific matters, to finance the expedition.

Tribute To Queen Mary

Good Example As Housewife Opinion Of Her Treasurer

Queen Mary is "too good a housewife" in the opinion of Sir Edward Wallington, who at the age of 73 years, has just retired from the post of Treasurer to the Queen.

"I have paid all the Queen's private bills since my appointment 13 years ago," says Sir Edward, "and not once had I to query her accounts. She is an example to the housewives of Britain for wise shopping, careful spending and discriminating choice."

No Mishaps In Air

Vancouver's Sea Island Service Had No Accidents In 1932

Vancouver's sea island airport carried on its activities during 1932 without a single accident, according to the report of Manager William Templeton, to the civic airport committee. Passenger flights for the year numbered 707; test flights, 40; student instruction flights, 754; student solo flights, 1,859; arrivals, 309; departures, 310; visiting aircraft, 134, and passengers carried 2,652.

Winnipeg Newspaper Union

By Ruth Rogers

A SLENDERIZING STYLE YOU'LL LIKE

Its smart tailored lines meet everyday requirements.

Almost any of the soft new wools are lovely for this model—a very becoming style for the normal or slightly over-normal figure.

You'll notice that since the center of the cross-over bodice is cut in a panel effect and left buttoned, it combines with the skirt panel to add height to the figure.

Rough crepe silk would be equally suited to this model.

Style No. 313 is designed in sizes 16, 18, 20 years, 36, 38, 40, 42 and 44 inches bust.

The original was in the popular rust tone in a diagonal woolen weave. White pique was used for the inset vest.

Size 36 requires 2 1/2 yards 54-inch with 1/2 yard 50-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

ARM NUMB WITH RHEUMATISM

Woman's Thanks to Kruschen

"I have been suffering from rheumatism for years. At one time I could scarcely walk with pains in my feet. The thumb of my left hand was so stiff I could only bend it with the aid of the right hand. I was afraid to go to bed, as my right hand and arm up to the elbow used to go numb, and the pain was just terrible until I got the circulation going again. I started to take a half-teaspoonful of Kruschen in a glass of hot water before breakfast, and believe me I feel a different woman. I tell everyone what I take, and the good it has done me." (Mrs.) W.A.B.

Kruschen contains six mineral salts which tone up the liver, kidneys and stomach—and keep them working smoothly and efficiently. The reward of this internal cleanliness is a freshened and invigorated blood-stream. Poisonous uric acid is expelled through the natural channels, and the pains of rheumatism cease. And as you continue with Kruschen, your whole being—body and mind—responds to its purifying force.

More Employed In England

Activity In Several Lines Of Work Shows Increase

Employment is improving in England. The number of registered unemployed decreased by 76,519 between November 11 and December 19. The increase is credited to the usual seasonal improvement but in several lines of work activity has increased.

More employment is reported in coal-mining, iron, and steel industries, general engineering, cotton and jute trades, tailoring, bleaching and dyeing, finishing works, distributive trades and hotel and boarding house services.

Less employment is reported in building jobs, public works contracting, pottery, boot and shoe industries, hosiery manufacturers and the woolen and worsted industry.

Ski Jumpers Buy Snow

Illinois Club Ordered Six Car Loads From Wisconsin

It may not have snowed in sufficient quantities for ski jumping, but the Norge Ski Club had snow for its annual tournament at Gary, Ill., on January 19.

After canvassing the region, club officials learned that there was plenty of snow about 400 miles north of Chicago, up in Wisconsin, and placed an order for six freight car loads.

The science of fighting fire has become so specialized that the fire departments of large cities are organizing fire colleges to train their men.

+ Do You Know? +

Photograph, Canadian National Railways

WHAT the tamest bird in the woods is the Canada Jay? It is sometimes called the "Whiskey Jack" and is nearly always to be found around logging grounds or deserted lumber camps. This latter fact may account for a superstition among many old lumber jacks in northern Canada that the Canada Jay is the soul of lumber men who died or were killed during the logging drives. The photograph shows a Canada Jay brazenly helping himself from a camper's frying pan.

SUNDAY SCHOOL LESSON

JANUARY 22

JESUS FORGIVING SIN

Golden Text: "The Son of man hath authority on earth to forgive sins."—Mark 2:10.

Lesson: Mark 2:1-12.

Devotional Reading: Psalm 32:1-7.

Explanations and Comments

Jesus Is Criticized For His Words To a Paralytic, versus 1-12.—On one of Jesus' visits to Capernaum, his headquarters, it became known that He was in the house and the people hurried thither in great excitement. They crowded into the room, jammed the door leading to the street, and hung around in crowds outside. Four men, who had heard of Jesus' wonderful deeds of healing, determined to bring to Him a friend who was paralyzed, but when they approached the house carrying the paralytic on a light pallet, no one would make way for them.

The hearers of Christ were so anxious to get every word that fell from His lips that they shoved the invalid out of the way in order that they might hear the better. The picture is typical. It is well enough to seek for ourselves the highest advantages of Christian worship, to pay heavily for costliest architecture and religious luxuries, but the spectacle of a church paying ten dollars for itself where it pays one for aggressive outside work is calculated to call to mind the Gospel scene where every man's very eagerness to hear eclipsed in him the real spirit of Christian unselfishness.—Francis J. McConnell.

The four men were persevering and resourceful and undaunted. They carried their burden up the outer stairway to the roof, removed the covering and made a hole large enough to let the man down on his bed at the feet of the Great Physician.

The four friends brought the paralytic to Jesus for bodily healing; Jesus began to reward them by forgiving the man's sins. Seeing their faith, we are told, Jesus said to the man, "Son, thy sins are forgiven." Jesus "knew what was in man," Mark 2:25, and knew that the man needed spiritual healing as well as physical help. "See what the faith of others may do for one!" exclaims an ancient writer.

Jesus distinctly recognized the faith of his hearers as well as that of the sufferer who was borne. Humanly speaking, the palsied man would have recovered and salvation to the faith and self-sacrifice of his four friends. The great lesson comes out here that to an unknown extent it is possible to inspire and to bring about the salvation of others by our faith and co-operation. Our faith cannot supersede theirs, it is never a substitute for the faith of those more immediately concerned; but it prompts and strengthens their faith.—W. L. Watkinson.

Nose rings, like those worn by African slaves are said to be the fashion in Paris.

London had 4,562 fires, with an average damage of \$750 last year.

Try Miss McFarlane's Favorite Recipe for BISCUITS

1/2 teaspoon salt 4 teaspoons Magic
2 cups pastry flour 2 Baking Powder
1 1/2 cups 2 tablespoons
1 egg 1/2 shortening
1/4 cup milk, or half milk and half water

Mix together flour, baking powder and salt. Cut in the chilled shortening. Now add the chilled liquid to make soft dough. Toss dough onto a floured board and do not handle more than is necessary. Roll or pat out with hands to about 1/4 inch thickness. Cut out with a floured biscuit cutter. Place on slightly greased pan or baking sheet and bake in hot oven at 400° F. 12 to 15 minutes.

"For Light, Flaky Biscuits use Magic Baking Powder,"

says Miss M. McFarlane,
dietitian of
St. Michael's Hospital,
Toronto

"I RECOMMEND Magic because I know it is pure, and free from harmful ingredients."

Miss McFarlane's opinion is based on a thorough knowledge of food chemistry, and on close study of food effects upon the body. On practical cooking experience, too.

Most dietitians in public institutions, like Miss McFarlane, use Magic exclusively. Because it is always uniform, dependable, and gives consistently better baking results.

And Magic is the favorite of Canadian housewives. It accounts for all other baking powders combined. You'll find Magic makes all your baked foods unusually light and tender... and gives you the same perfect results every time.

Free Cook Book—When you bake at home, the new Magic Cook Book will give you dozens of recipes for delicious baked foods. Write to Standard Brands Ltd., Fraser Avenue and Liberty Street, Toronto, Ont.

Made in Canada

An Artificial Heart

Device Has Been Developed and Tested By Moscow Surgeons

An artificial heart has been developed by Moscow surgeons, which, when perfected, is expected to revolutionize methods of operating on the heart. It is a device for pumping the blood through the arteries like a real heart. The heart of a living dog was taken right out of its body and operated on while the "artificial heart" kept the body alive. Sixteen stitches were taken in the heart and then it was put back into the body. The dog had survived.

Many new gold-dredging companies are being organized in New Zealand.

JAPANESE SEEK CONTROL OF JEHOI PROVINCES

Shanghai, China.—Ten thousand Japanese soldiers are marching into the province of Jehoi, Chinese press despatches said today, and are en route to Lingyuan, which is about 90 miles north of Shanhaikwan, the city at the eastern end of the Great Wall, occupied last week by the Japanese.

The despatches also said a Japanese landing force had gone ashore at Chingwantan, Chinese seaport about 10 miles southwest of Shanhaikwan. Patrols have been put out by the landing force, it was reported.

The column proceeding into Jehoi, the despatches asserted, included artillery and cavalry marching from Sutichung, north of Shanhaikwan, which is in Japanese hands.

Japanese military leaders have said for some time that they intended eventually to gain control of the province of Jehoi and to annex it to the state of Manchukuo which has been established, with their assistance, to administer Manchuria.

The city of Jehoi, capital of the province, used to be used by the Manchus emperors as their summer residence.

The National Government at Nanking has reiterated that it will not accept the Japanese thesis that the capture of Shanhaikwan is a local incident. Instead, the Chinese policy will be that the occupation of that city is part of the whole Chinese-Japanese dispute which is awaiting settlement by the League of Nations.

Concessions To Peasants

Russia May Decide To Abolish Grain Concessions

Moscow, Russia.—Long-expected concession to the peasantry in the effort to extract from that class enough agricultural produce to feed the country assumed definite form in the publication of a speech by Vyacheslav Molotov.

The president of the union council of the people's commissars announced that the government probably would abolish "collections" of grain and substitute a grain "tax" in kind. Returning to a system in effect 10 years ago, the grain production of the country would hereafter be placed on the recently instituted basis for meat and butter production.

Russia Executing Thieves

Men Sentenced For Stealing Jam From Government Warehouse

Moscow, Russia.—Four men were sentenced to death and three others to 10 years in prison for stealing jam from a government warehouse. The manager of the warehouse and three employees are to be shot, three other employees will go to a prison camp in the most remote region of the country, and two others must spend three years in jail for the crime, which was characterized as "causing great harm to the workers' supply."

Would Grant Pension

Washington.—A pension of \$5,000 yearly for Grace Goodhue Coolidge, widow of the late former president of the United States, was sought in a bill introduced by Senator Warren R. Austin, Vermont Republican. Congress usually votes pensions to the widows of former presidents.

Alberta Seed Growers

Edmonton, Alberta.—Joseph H. B. Smith, of Wolf Creek, Alberta, was elected president of the Alberta Seed Growers' Association recently at the directors' annual meeting. Mahon Watson, of Provost, was chosen vice-president.

Ensure Dollar Wheat

Montreal, Que.—Dutch farmers get \$1 a bushel for their wheat, according to F. Stius, Dutch seed merchant, who is here on business. The government provides a subsidy to bring the price up to this amount.

Electric refrigerators are to be taxed in Peru.

W. N. U., 1977

Pension Act

Veterans Claim Something Wrong With the Way Act Is Operating
Ottawa, Ont.—An impressive array of veterans, each well equipped with experience in the intricate solution of pensioners' problems, appeared before the joint committee investigating the administration of the Pension Act and told that body what they considered to be wrong with the way the act was operating.

Practically all witnesses were unanimous in their disapproval of the attitude toward returned soldiers of the counsel employed by the board of pension commissioners.

"Sometimes," said A. E. Moore of Winnipeg, chairman of the Dominion executive council of the Canadian Legion, "I listen to these counsel and expect every moment to hear them turn to the tribunal with the words: 'I therefore submit that this man be taken from hence and hanged by the neck until he is dead.'"

Witnesses argued that section 73 of the Pension Act, known as the "benefit of the doubt" clause, was not being applied in accordance with the intention of parliament and of the people of Canada.

It was impossible, so many years after the close of hostilities, Mr. Moore declared, for a man to establish definitely the circumstances and the place responsible for inflicting upon him the state of health that eventually resulted in a disability. The onus of proving conclusively that the man's disability was not due to war service should rest with the board.

Property Owner Not Protected

Debt Adjustment Act Provides Only For Present Occupant

Saskatoon, Sask.—"While governments are giving protection to persons in possession of property, and who are living therein, under the terms of the Debt Adjustment Act, which have been purchased on agreements of sale, or for which a second mortgage has been taken, no consideration has been given to the original owner who sold the house and who is relying on principal and interest payments to meet obligations incurred in the creation of the property," states David C. Kyle, Saskatoon barrister.

"Many people who have invested their life savings in such properties are now facing the threat of loss of their equities, as the concessions made the occupant owner by the Debt Adjustment commission has curtailed the revenue from the property to the original owner to such a low mark that he is unable to meet interest, principal and other charges against the property."

Entry From New Zealand

First Received From That Country For Grain Show Competition

Regina, Sask.—First entry from New Zealand to the competitive classes of the World's Grain Show has reached the office of the organization.

It came from D. McGill, a farmer of Tipua, Southland, New Zealand, in the oats class.

A few days ago 12 entries came from T. A. Allan, a farmer of Meridian, Idaho, his entries being as follows: four wheat classes, four barley classes, two millet classes, one dent corn and one rye.

Closing dates for entries in January 31 and closing date for receipt of grain samples is March 31.

South African Politics

General Smuts In Favor Of A Coalition Government

Cape Town, South Africa.—Tension in South Africa's political situation was augmented when General Jan Christian Smuts, leader of the South African party, arrived here to confer with his colleagues regarding negotiation to overthrow the government.

Thousands of cheering people greeted General Smuts on his arrival at the station from Johannesburg.

In a brief interview the general indicated his willingness to accept a subordinate part in a coalition government if it appeared in the best interests of the nation.

URGES DOLLAR-POUND PARITY

The Hon. L. P. D. Tilley, Minister of Lands and Mines in the New Brunswick cabinet, in a recent speech urged the establishment of the Canadian dollar on a parity with the British pound, with a view to revitalizing Canadian industry.

Criticizes Board

Charges That Land Board Of University Had Loose System

Winnipeg, Man.—Charges that for 10 years the methods of the land board had the "loosest imaginable system of directing the investments of the University of Manitoba," which was its statutory duty, were made before a board of inquiry by J. T. Thorson, K.C., in summarizing evidence regarding the \$1,000,000 deficit in University of Manitoba funds.

Mr. Thorson, associate counsel for the commission inquiring into the shortages, said no member of the board ever asserted his authority to direct the investments which, he said, was a "most astonishing situation." No member of the board, he said, ever went to the board of governors to find out what authority the land board had.

Brisk Trade With China

Vancouver, B.C.—The one ship per month which the British Canadian Steamship Company had estimated to take care of the subsidized Canada-China lumber trade has proved inadequate and four steamers will take about 12,000,000 feet to the Orient within the next six weeks. The same ships will also take 9,000 tons of wheat and 1,100 tons of salt fish.

SCENE OF THE LATEST POLITICAL BATTLE

The whole of the Irish Free State is seething with the excitement of a General Election, an election, which came a little earlier than was expected. Ex-President Cosgrave is fighting for power with promises that he will enter into friendly relations with the Mother Country and "in three days" procure benefits for the farmers who have been hard hit by Britain's tariff. Eamon de Valera (lower right) maintains his stand on the annuities payments to Britain and is determined to make the Free State economically independent of the rest of the British Isles. He is waging a bitter campaign against the Cosgrave Party, whom he claims, is in collusion with the British Government.

Want Uniform Relief Policy

Alberta Federation Of Laborers Concludes Sessions

Calgary, Alberta.—Establishment immediately of a uniform relief policy by the Alberta Government was sought by the Alberta Federation of Labor in concluding its annual convention here.

Alderman Fred J. White, M.L.A., Calgary, was re-elected president for an eighth term, and Carl E. Berg, Edmonton, was elected secretary-treasurer to succeed Elmer E. Roper, Edmonton, who was elected president of the Alberta section, Canadian Labor Party, at its gathering preceding the federation's convention.

Allegations of wide variation in relief policies and administration throughout the province were made during the debate on the relief question. In urging a uniform policy for cities, towns and country, the delegates asked the maximum aid now granted become the minimum, and, where necessary, increased assistance be given destitute.

Geneva Conference

Forty-Hour Working Week Is Advocated By Delegates

Geneva, Switzerland.—The question of the maintenance of wages at their present level or reducing them arose as a crucial issue at a discussion of a proposal for a 40-hour working week before the international conference on unemployment.

Leon Jouhaux, general secretary of the French confederation of labor, declared that working hours must be reduced without any wage cuts. M. Jouhaux told the conference that unless the world unemployment situation is relieved civilization may be destroyed. Thirty million men and women—one-sixth of the world's workers—are jobless, he said, and even a revival of industry would not provide a remedy, for technological unemployment would remain a tremendous factor.

Request Goes Begging

Winnipeg, Man.—George Velle, pioneer citizen left \$1,000 to the "Newsboys Club of Winnipeg" when he died in 1912, but no such organization now exists and his executors may be forced to apply to the Manitoba legislature for the necessary authority to dispose of the bequest.

CENTRAL PARTY OPPOSE POLICY OF DE VALERA

Dublin, Irish Free State.—The Central party in the Irish Free State election campaign issued a manifesto indicating it intends to secure, if possible, the balance of power in the new dail eireann which the Laborites held in the old.

Frank McDermott, leader of the Centralist group, which has the support of the National Farmers' League and the Ratepayers' League, said in the manifesto his party was not going to be "captured" by the National party, nor allow politics to "drift back into the same old rut."

At the same time the pronouncement denounced Eamon de Valera and his Republicans and said the Centralists would see "long delayed justice" given the agricultural community.

The party, it said, would do its best to see increasing war waged against poverty and intolerance, "two deadly enemies of a kindly, self-reliant Irish nation."

What success the Centralists would have at the polls on January 24 was uncertain, but they appeared to have aroused considerable friendship among the farmers of the nation.

Nominations, which closed tonight, showed the Centralists with 21 candidates in the field while the Laborites had placed 22.

Spanish Riots

Estimated That 42 Persons Have Been Killed

Madrid, Spain.—Outbreak of anarchist and syndicalist violence, which began recently, continued in many Spanish cities, although governmental authorities declared their belief that the disturbances had definitely been quelled.

It was estimated at least 42 persons have been killed during the disturbances which have been marked by frequent bomb explosions, seizure by extremists of public buildings and documents, and efforts to disrupt communications.

The number of persons injured has not been officially estimated, but it is thought the toll will reach far above 100. Numerous persons have been arrested.

Kidnapping Plot

Millionaire Contractor In East Receives Threatening Letters

Toronto, Ont.—"Kidnapping plot which police regard with the utmost gravity is said to have been disclosed in an extortion letter received by James Franceschini, millionaire contractor of Mimico." The Toronto Star says it learned from an authoritative source.

The first letter demanded "a fabulous sum," and threatened abduction of Franceschini's little daughter. A second letter is said to have been received and guards patrol grounds of the contractor's home.

Visiting Western Canada

Ottawa, Ont. Dr. E. S. Archibald, director of the Dominion Experimental Farm, is in western Canada, where he will spend the next five weeks touring the various experimental farm stations in the west. While there he will attend an executive meeting of the boards of directors of the World Grain Fair at Regina.

Gas Conservation Plans

Calgary.—Temporary withdrawal of motions questioning legality of public hearings of the Turner Valley gas conservation board was effected until January 23 and the way left open for the board to further its studies with a view to conserving gas for domestic use in southern Alberta cities and towns.

Death Of Senator Daniel

Saint John, N.B.—Hon. Dr. J. W. Daniel, doyen of the Canadian senate, died suddenly at his home January 11th. He would have been 88 years old on January 26. The aged senator had been ill since Saturday, January 7, with influenza and complications.

Red Tape Is King.

The Sun recently printed the story of the Starving Cow and the Stack of Hay, to illustrate what a disadvantage red tape is. The following reprinted from Labor, Washington, D. C., is along the same line:

"North Dakota farmers are letting their potatoes rot in the field because the price is too low to pay for digging. A short distance to the north, the Manitoba farmers, hit by drought and grasshoppers, lost three crops, and have not even enough to eat. North Dakota sent word that their Canadian friends might have all the spuds just for the digging."

The article goes on and further states that the Canadian Minister of National Revenue, when asked to suspend the duty in the present emergency, is said to have replied that this is "not a proper remedy" and that to let in free potatoes to hungry people would be "unsound principle." The laws of the Medes and Persians evidently had nothing on the Canadian tariffs.

Printing Preserves and Promotes.

Of all the mechanical creations of man, perhaps that which has brought him the greatest good is the art of printing. Upon it depend all other arts for their propagation and preservation. And not only do the arts, using the word in its broadest sense, pass current thru the medium of the printed page, and owe it their permeability and perpetuation, but so also does every thought of the mind which is held worthy of multiplied expression. Indeed, of all the hurrying, whirling, helpful enginery of the day, but a single device, the printing press, is engaged in preserving against the needs of those to come the gathered knowledge of mankind.

Mail Order House—Nothing.

The following, where a moral is clearly shown, is taken from an exchange:

"Recently a church congregation in a little town built a new church. To pay for it they were obliged to call on the merchants of the community for donations. The merchants responded liberally and \$300 was raised from this source. The last man asked to subscribe was John Smith, a merchant. 'I will give you \$20 if you will let me add something to the list,' he said. The permission was granted and he wrote at the foot of the list:

John Smith, \$20
Mail order house, 00
Tea & Coffee peddler, 00

The church people saw the point when the minister read from the pulpit the list of donors to the building fund, and since the dedication of that church there have been no mail orders sent out from that town.

Cowboy's Tricks.

They tell about a hard-driving taxi driver who recently beat a red signal, threatened the traffic cop's knees, missed the safety zone by a hair and lightly grazed a bus, all in one dash.

The cop hailed him, then strolling over to the taxi, pulled a big handkerchief from his pocket en route.

"Listen, cowboy," he growled, "on yer way back I'll drop this, and you see if yez can pick it up with yer teeth."

Sparkie Says.

Toot unto others as you would have them toot unto you.

The learned judges of the Saskatchewan court of appeal have ruled that a washing machine is a luxury. Nice goin, judges! nice goin! And now, you women folk! let's hear no more squawkin' about your husbands not buying you luxuries.

CHAPTER IV.—Continued.

Alan's estimate that his quarry could not be more than half a mile in the lead, was true enough; but a stern chase is a long chase, and if those bandits were aching from exhaustion, they had the fear of death in their hearts to goad them on.

A whole hour, an hour of terrible labor, went by, and still no sight or sound of the bandits. With the responsibility of this patrol on him, with human lives, the lives of comrades, at stake, a fever gripped Alan that those bandits had taken the south branch of the Alouka. If they had, Frank Pedeneault and those two new recruits might run into, an ambush; or Ped might attack them, reckless feeling that he was, practically lone-handed, and get killed.

The chase was entering the Thal-Azzah itself, that watery wilderness of lakes and labyrinthine channels and muskeg thousands of square miles in extent. Not far ahead the branch split into a dozen channels leading in every direction. Pursuit would end there. A few miles more, and those canoes would be swallowed up in the watery oblivion of the Thal-Azzah.

But then, as he skirted around a headland, his prophesy yesterday to Haskell, and his conviction, founded on long man-hunting experience, that those bandits would surely follow the left branch, were suddenly proved true to the letter. On ahead, a scant thousand yards, he caught one fleeting glimpse of two heavily-laden canoes that carried six men.

Dipping faster, deeper, he and Bill and Larry paddled at a furious pace to come up within rifle range. The river was so winding that they could see only a few hundred yards in front. There was danger, a terrible danger, of running headlong into a blind ambush where all three of them would be killed outright and their canoes sunk before they even could start to shoot back. Every stroke, every curve, every clump of flags they skimmed close past, was a deadly peril. They knew it, but they dared not slow up. They were taking their chances.

As they skirted out upon a shallow little lake fringed about with tall flags, Larry suddenly heaved back on his paddle.

"NOW I FEEL FULL OF PEP"

After taking Lydia E. Pinkham's Vegetable Compound

That's what hundreds of women say. It steadies the nerves... makes you eat better... sleep better... relieves periodic headache and backache... makes trying days endurable.

If you are not as well as you want to be, give this medicine a chance to help you. Get a bottle from your druggist today.

W. N. U. 1977

"Lift out! Look! Alan, look over there!"

Alan looked where he pointed, at the north shore, at the wall of dense reeds. A path had been broken through the flags there; the reeds were parted, some of them trampled, their tops bent to either side.

It told the story to him. Hard-pressed, these men had whipped ashore to shake off pursuit; had lifted canoe to shoulder, and were trying to cut north and hit another channel. Obvious to ambush danger, they skinned over to the telltale break in the flags and drove out upon the mud. Alan and Bill slung the canoe upon their shoulders; and with Larry in the lead, following the signs, they started at a lopsided crawl through the flags.

Within a few hundred yards they came to a little creek, a sluggish muskrat highway that led north. The bandits had taken to it. Too shallow for a canoe, they had had to wade. So recently had they passed, the water was still rolled from their boots.

The little creek took Alan's party a thousand yards north to a lake, a deep blue lake covering several acres; and there, within the Thal-Azzah itself, late in the afternoon, the long relentless chase came to its end.

Larry, a dozen steps in the lead, glimpsed the silvery sheen of water ahead; and stopping dead-short, motioned Bill and Larry to be cautious. They belled forward toward the lake edge where the flags were thin and they had clear view.

After several minutes of waiting, Larry pointed across the lake and stated quietly:

"You see that big patch of brownish flags over there, about thirty or forty yards back from the water? See that little run leading back into them? That's where our men are hiding. They're lying low along that run. I just noticed a rat start up that run. He came back in a hurry. Then, there's a silent spot over there where I don't hear any bird or animal calls. And then some other signs..."

"He was silent for half a minute. Finally he whispered: 'I'll show you a sign. You see that start up of canvas-backs a-coming this way? They're flying low, making for this lake. Canvas-backs like blue water. Watch 'em close.'"

Skimming just over the flags, the pair of graceful ducks came on; but just as they stopped beating and started the glide down upon the lake, they suddenly breasted high up in the air, exactly over the spot Larry had indicated. Veering away, they winged swiftly out of sight into the west.

Lying there in the reeds and bog, Alan studied the bandit cover and tried to plan. If all five of the party had been along with him, the outcome would have been swift and certain. He could have come at the bandits from either side, cut off any chance of escape, boxed them between two fires and deliberately shot them down. But he had split his party at the Alouka Forks, as Haskell ordered. Now, at the crucial hour here in the Thal-Azzah, Pedeneault and those other two men, uselessly following that south branch, were a hundred and forty miles away.

He planned, rejected and planned again, and finally came to a decision.

"We've got to carry the fight to them, and we've got to keep them from getting away by that creek yonder. There's only one way we can do both those things. Bill and I are going to circle around them on foot and come at them from the other side. We'll get there somehow, even if we have to swim part way. With any luck at all we ought to get into a position where we can put two or three of them out of business at the very beginning, before they wake up to us. They won't fight if they can help it. Why should they take chances on some of them getting wounded or killed, if they don't have to? They'll try to whip back across this lake and dodge into that channel yonder. Now, Larry, you'll stay here to head that off. Keep out of sight yourself; have a couple of extra magazines handy, and wait till they get into the middle. When they get in good range, open up on them. Sink those canoes. We don't care about those men. Let them swim ashore and hide if they want to. On foot men can't make headway in this muskrat country. With no tent, no shelter, the mosquitoes

and flies would drive them crazy in less than a day, and they'd fall into our hands. If you understand now what's cut out for us, we'll be starting."

Both men nodded. Bill and Alan moved away with infinite caution, for one flushing waterfowl would raise all the others. Yard by cautious yard the two men slipped back into the rushes till they were a safe distance from the lake.

Then they began the long hard job of circling around the bandits.

Wet, muddy, tortured by insect pests, they pushed steadily on, mindful of coming twilight.

It took an hour and a half to make the wide careful circle and start coming in toward the bandits from the north. With the sun cut in two by the western horizon and the chill of twilight in the air, those six men would shortly be on the move. But Alan's hopes had risen again; it seemed that he indeed "had taken his luck along." The bandits did not know they were being stalked. In half an hour more, if luck held, he and Bill would be in position to open on them all unawares.

Dropping at last to hands and knees, the two of them crawled along through muck and water, keeping only their guns dry. They came up within a hundred yards of their quarry.

As he parted the reeds in front of his face Alan saw the tops of a clump away suspiciously. A moment later he glimpsed the dim outline of a man standing up, stretching himself, sitting down again.

In actual sight now, those men who had killed Jimmy Montgomery! And only a pistol shot away! But to take them... Alan crouched savagely at the thought of Pedeneault and those two men a hundred and forty miles distant. As he remembered what Haskell said about the Law being behind his patrol, his lips curled in scorn at the can't expression.

"The Law that's supposed to be back of us, I wonder where in—! It is now! What does it mean to Bill and me now?" Here in this watery wilderness in the creeping twilight, he and Bill were going up against the Law. He had stood off fifty and who had murder charges hanging over their heads. And if they broke away, Larry single-handed would have to stand the whole brunt of stopping them.

They Came Up Within a Hundred Yards Of Their Quarry

At his gesture Bill slid cautiously up beside him. In whispers, Alan said to him: "Bill, we've got to get closer. We've got to get across this pond. Behind it they stopped; are particularly good luck for us. By keeping down in the water, with these little reeds to help hide us, we can sneak from one house to the next. The last one isn't a dozen yards from those men. If we make it we'll have point-blank range and the best kind of cover to shoot from."

Taking off their hats and jackets, they wriggled carefully out of the tall flags, eased into the water and squirmed toward the first muskrat house, which stood up four feet above the surface and entirely hid their approach. Behind it they stopped a moment, chose their next one, and sank back into the water.

As they crouched down behind the third little dome of mud and reeds, a towering red-bearded man parted the flags they were staring at, bent and scooped up a handful of water, took a swallow, threw the rest down with an oath at its vile taste; and then, shaking

Throw Off That COLD!

Some men and women fight colds all winter long. Others enjoy the protection of Aspirin. A tablet in time, and the first symptoms of a cold get no further. If a cold has caught you unaware, keep on with Aspirin until the cold is gone. Aspirin can't harm you. It does not depress the heart. If your throat is sore, dissolve several tablets in water and gargle. You will get instant relief. There's danger in a cold that hangs on for days. To say nothing of the pain and discomfort Aspirin might have spared you! All druggists; with proven directions for colds, headaches, neuralgia, neuritis, rheumatism.

ASPIRIN

TRADE-MARK REG. IN CANADA

ing the water out of his hat, he disappeared again.

Alan's last secret doubt about these bandits being utter strangers in the country was dispelled now. He had had a clear view of this huge red-bearded leader; he could say positively, as Ashmun and all the passengers had sworn, that he had never laid eyes on the man before.

To Bill he whispered: "When we reach that last house, I'll splash or do something to draw their attention. They'll come out to the flag edge again to see what it is. Don't shoot when just one man shows up. We'll wait till we have three of them in plain sight. If we get three of them at the first crack, we'll be fighting the other three on even terms. Now, Bill, when you're looking down a rifle barrel at those men, don't hesitate. Aim straight. We can't make prisoners of that outfit. This is a flash fight. One or the other party is going to get wiped out."

They started for the fourth muskrat house.

(To Be Continued.)

THE RHYMING OPTIMIST

By Alice Michaels

CHOICE

I'd rather see your eyes aglow
With faith and love and gladness,
As once I saw them when the world
Was gay with April madness.

I'd rather see your smiling eyes,
So brave, clear and tender,
Than all the gems of all the kings,
Abaze in regal splendor!

I'd rather hear the voice of you
In happy laughter flowing,
As when I heard it on a day
When April winds were blowing.

I'd rather hear your luring voice
In madcap laughter ringing
Than cherubim and seraphim,
And all the angels singing.

Many Have Decoration

French Legion Of Honor Held By
153,049 Persons

Holders of the Legion of Honor now number 153,049, according to statistics just published in Paris. This number includes thousands of foreigners who have been awarded the coveted decoration which all Frenchmen aspire to gain. The chevaliers number 125,150, the officers 21,213, and the commanders 3,145. Holders of the Grand Cross total only 78.

"I think your picture's adorable. It breathes the very spirit of dawn. What are you going to call it?" "Sunset."

Little Helps For This Week

"When He giveth quietness, who then can make trouble."—Job 34: 29.
"None of these things move me."—Acts 20: 24.

I've many a cross to take up now,
And many a left behind;
But present troubles move me not,
Nor shake my quiet mind.
And what may be tomorrow's cross
I never seek to find;
My Father says "Leave that to me,
And keep a quiet mind."—Anon.

Let us then think only of the present, and not even permit our mind to wander with curiosity into the future. This future is not yet ours; perhaps it never will be. It is exposing ourselves to temptation to wish to anticipate God, and to prepare ourselves for things which He may not destine for us. If such things come to pass, He will give us light and strength according to our need. Why should we desire to meet difficulties prematurely, when we have neither strength or light as yet provided for them? Let us give heed to the present, whose duties are pressing. It is fidelity to the present which prepares us for fidelity in the future.—Fenelon.

U.S. Unemployment

Estimated That 1,550,000 Were Out
Of Work In November

An "all-time peak" of unemployment in the United States was reported recently by William Green, president of the American Federation of Labor, who estimated that 1,550,000 were out of work in November.

Noting that this figure was greater by 150,000 than the previous high mark reported for August, he added that word from affiliated trade unions indicated the total for early December was even greater than that for the previous month.

They say Shakespeare never told the same story twice, but there's nothing unusual in that. Plenty of court witnesses have the same record.

Farmers raise 70 per cent of their own food.

The U.G.G. and the Grain Situation.

E S McKory, manager in Alberta for the United Grain Growers Limited, when interviewed with regard to the grain situation, said this firm expects Vancouver to be its main export office, though one is operated in New York City for the sake of convenience and proximity to Liverpool.

With the development of general business at Vancouver, a year round port, available to ships with cargoes from the Old Country, there would be increased demands for grain to be loaded on these ships when returning to the United Kingdom or Europe.

"The 6 cents a bu. preference will be a much greater factor in marketing Canadian wheat in the Old Country when exchange is righted," said Mr McKory.

Having completed construction of an addition, United Grain Growers Limited now have capacity for storing 2,600,000 bu. in its Vancouver elevator.

Dewald-Schoepp

On Sunday, Jan. 15th, Miss Mary Schoepp (daughter of Mr and Mrs P Schoepp of Blueberry district) was united in the holy bonds of matrimony to Mr Wm Dewald (son of Mr and Mrs P Dewald of Mewassin).

The ceremony was performed by the Rev H Kuring, the pastor of Blueberry Lutheran church.

After the ceremony the bridal party motored to the home of the bride's parents, where they, with a large number of invited guests, sat down to a sumptuous repast.

The happy couple were the recipients of many handsome and costly presents. They will take up their residence on the bridegroom's farm in Mewassin district.

In the evening the Newlows were serenaded by the Blueberry Band, and the bridegroom gave the serenaders a handsome sum with which to regale themselves.

Sporting Notes

A rink from the local Curling Club is billed to go to Fort Saskatchewan in the near future, to make an effort to get back the Silver Cup the Forters captured from Stony.

A quartet of lady curlers from Stony club visited at the Thistle rink last week, and curled a very close game with the City ladies. The rink comprised Mrs O G Wudel skip, Mrs Henry Oppert-hausser, Mrs Connolly, Mrs A E Michael.

Members of the local Curling Club are apparently anxious to have the club represented at the coming Edmonton Bontspiel and it is probable the President, Vice-President and two good curlers will comprise the team to be sent in.

Paul Schroeder, the well-known boxer, has gone to Edmonton, to train at the "Y" Gym, for his coming bout with Bonnie Tait.

That the curling game is full of surprises was again exemplified on Monday night, when the Gannon Rink (Kelly, Reiser, Young) beat Bill Connolly's top-notch rink, composed of R Sherwin, J Elder, H Loeblich.

Brightbank Items.

Brightbank U. F. A. Local is putting on a pie social and dance on Jan. 27, proceeds to go to the girls' basketball team. All guests not buying a pie will pay 25c for dance and lunch. Ladies will please bring lunch; cups and coffee will be supplied.

The wedding dance given at Hansens by the Newlows Mr and Mrs Kett, was well attended by those from this district. A fine night was spent and a fine supper served at 12. On their return from a honeymoon trip to the Coast the happy couple will reside in Wainwright district, where Mr Kitt has a farm. Mrs was, before her marriage, Miss Tina McDonald, daughter of Mr and Mrs Jas McDonald.

Mr J W Bowser is making a slow recovery from an attack of flu.

The flu epidemic, which has been prevalent in this district for a while, is now showing signs of abatement, and the victims are slowly recovering.

On account of the deep snow up north, the party of local big game hunters which returned only recently, did not have the good luck they expected getting caribou and grizzlies. They brought back a fine set of antlers.

The sleighing party given recently by Mr J Kyle is reported to have been a very enjoyable event.

After spending the holidays with his father, in this district, Mr A McDonald returned to Carvel, where he is employed by Gillespie Grain Co.

Mr Karl Groskopf, Hansen Corners enterprising farmer, was a week-end visitor with Mr H Sommerfield.

When Land was Cheap.

The Edmonton Bulletin, in its Friday issue, under the caption "Thirty Years Ago," had this item: "The two northern tiers of sections on the Stony Plain Indian Reserve were sold by the Department of the Interior at Ottawa, some weeks ago. The prices ranged from \$4 per acre to \$8.50."

Stony Plain and District

Mrs Christie has her mother, Mrs Ronzer of Kintawistie, visiting her this week.

Mr Ainer Anderson is in Calgary this week, attending the United Farmers of Alberta Convention, as a delegate from Hobburn U. F. A. Local.

The members of the Union Ladies' Aid Society are holding a Silver Tea and sale of home cooking on Saturday afternoon, Jan. 21, from 3 to 6 o'clock, at the church. All are welcome to come.

Among the 43 talesmen summoned for jury service at the sittings in Edmonton this week of the Supreme Criminal Court, were three men: John Arnbruster, Louie Wudel, George Liebert. This week's sittings are being presided over by Mr Justice Ives; Chief Justice Simmons will preside next week; with Mr Justice Ewing the following week.

BUTTER AND EGGS WANTED at The Royal Cafe.

Lost—1 Clyde mare, about 1400 lbs., 12 years old; white star on forehead. Apply Jac Ursel Jr., Stony Plain P. O., or Sun Office.

The Hope Mission, Edmonton, is asking farmers of this district for donations of butter, meat, whole wheat, for distribution among the City's poor.

Before the P. M.

Magistrate E Williams had several cases come before him at his weekly session on Monday of police court, in the town hall. One of the cases was the outcome of the moving, last week, of the old Ukrainian hall to the village of Carvel. During the moving John Washlyshin of Carvel asserts that he had been assaulted by one Harry Schae-gie, and a charge was accordingly laid. Considerable of the time of the Court was taken up in the hearing of the evidence in this case. When the witnesses had finished, the Magistrate dismissed the case, and Mr J Washlyshin was mulcted for the Court costs. Geo. J. Bryan appeared for the defendant Schae-gie.

School Board Salaries Cut in Half.

At the annual meeting last week of ratepayers of Rimby S.D. a resolution carried that the School Board should cut all salaries in two at the end of the present school year, in the event of prices of farm produce remaining at present low levels. This grew out of the demand that expenditures be reduced so that the taxation burden would not be so heavy as to drive people out of their homes or reduce their standard of living to the minimum.

The Sun's Calendar.

JANUARY—
21—Silver Tea at United Church.
22—Hockey game at 8 p.m.
27—Whist Drive in Town Hall by Town Band.
27—Pie Social and dance at Lucknow School.
28—Reception by the Editor. for overdue subscriptions.

FEBRUARY—
6—Bontspiel in Edmonton.
9—The Legislative session.
18—Meeting of Luga ratepayers and nomination for Councilors.
28—Election for Councilors for Luga M.D.

Spruce Grove News

A serious accident was narrowly averted on Tuesday Jan 10th, when Mr R Nelson was motoring Mrs Nelson to an Edmonton hospital. While trying to avoid another car, Mr Nelson was unfortunate in having his car crash into a pole at the roadside, opposite Government House. Luckily, neither of the car's occupants was injured.

Miss D Bates, who had been teaching at a school in St Paul de Metis district last term, is now teaching at Onion Lake, Sask.

A dance in aid of School funds was held on Friday evening last, Jan. 19, at the Michael school.

Mr Dan Brox is on the reception committee of Alberta Oldtimers' Ass'n, which is holding its annual banquet at the Macdonald Hotel tonight, the 19th

Having been on the winning side in the recent big curling contest up at Stony's curling rink, the local quartet skipped by W.J. Connolly, are wondering when the Hasseppfeffer banquet will take place, and if the banquet will be staged at the Macdonald. In the meantime, the Grove rink is engaged in another contest, and seem to be "making good."

A dance is billed for next week at Winterburn Community Hall.
